

CLIMATE EMERGENCY

Councils....

Government....

Where are you?

The science is clear.

We need a zero-carbon-2030-plan.

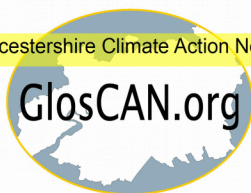

Emissions must peak by 2020.

**We need a public information campaign, that
explains the science and the policies needed.**

This issue will change everything we do.

**You, our elected public bodies, funded by us,
will now start this process, because you are there
for the well-being of people here,
now, and into the future,
aren't you.....?**

Gloucestershire Climate Action Network

**CLIMATE EMERGENCY VIGIL
at Rowcroft/Wallbridge, Stroud, town centre,
4.30 – 5.30 pm
Every Friday**
